Drive your Ambition

OUTLANDER

PLUG-IN HYBRID EV

IT'S A BIT ROCK 'N' ROLL

THE EV WITH AN EDGE

Mitsubishi Motors has been at the forefront of technological innovations since 1917. Having launched the inventive Super Select 4WD-II system and the world's first Plug-in-hybrid electric SUV, our vehicles have been tested and triumphant on some of the world's toughest terrains including the Dakar Rally. These engineering milestones, together with our commitment to reliability and ingenuity, sets us apart. As we continue to move forward, pushing the boundaries of innovations, you can rest assured your Mitsubishi has been built for your next adventure.

GO THE DISTANCE

The new Outlander Plug-in Hybrid EV cranks up performance, plus eco-friendly efficiency, on and off the road. With twin electric motors and a hybrid petrol engine, this isn't your average hybrid - it's the best of both worlds. Now with greater battery capacity (22.7kWh) and more range than ever before (up to 103km*) it gives you an all access pass to adventure.

*Based on sample vehicle tested in accordance with ADR 81/02. Actual results will vary depending on traffic conditions, vehicle condition and driving style. Lithium-ion cells degrade over time, and any decrease in battery capacity will reduce electric range.

EV POWER PURE PERFORMANCE

Seamlessly switch between electric and hybrid petrol power without missing a beat and recharge on the fly with regenerative braking. That's performance that keeps going.

STAY IN CHARGE

Lightning Fast Recharging

Quickly recharge your Outlander Plug-in Hybrid EV to 80% capacity in as little as 32 minutes using a public rapid recharging station.

Charge Anywhere

Plug in to any standard power point to charge your Outlander Plug-in Hybrid EV in approximately 10 hours or in 6.5 hours using a home or public charging device (EVSE).

Regenerative Power

In addition to plug-in top ups, your Outlander Plug-in Hybrid EV will continue to generate power during regular driving, whether you're using the electric motor or hybrid mode.

POWER TO CHOOSE. POWER TO YOU.

The Outlander Plug-in Hybrid EV uses two small and lightweight high-powered motors – one in the front and the other in the rear to deliver smooth driving and instant acceleration performance only an electric system can provide.

While mainly running on motor power, the vehicle can also seamlessly switch to engine power in response to battery and driving conditions. So there's no need to worry about remaining charge levels.

EV Driving

EV DRIVE MODE
Quiet and exceptionally clean, EV driving is perfect for low to medium speeds in urban areas.

Hybrid Driving

SERIES HYBRID MODE
When accelerating or climbing hills, the hybrid petrol engine can be used to generate additional power while the vehicle runs on motor power.

PARALLEL HYBRID MODE
For high-speed driving such as overtaking vehicles on the highway, the vehicle runs on engine power while being assisted by the motor.

FULLY EMPOWERED

Overseas model shown.

Inside the Outlander Plug-in Hybrid EV's luxuriously appointed cabin, you're immediately surrounded by sophistication and innovation.

The Outlander Plug-in Hybrid EV acts as a mobile battery, offering a power source when needed for outdoor activities like camping or in emergency situations such as a blackout*. Both the centre console and the boot have standard power points†, with a maximum load of 1500W combined. This is enough to support electrical equipment and appliances like a laptop, hair dryer, hot plate, kettle, phone charger and much more.

Directly in front of you is the 12.3" digital driver display screen that provides all your vital driver information and a clear visual representation of the road surface you choose on the drive mode selector.

The high-definition head-up display system* is a game-changer, projecting real time vehicle information directly onto the windscreen. Its eyeline can be adjusted to suit individual drivers.

All you'll hear is the pure silence of twin electric motors as a host of innovative technologies instantly link to ensure everyone's safety.

Thanks to the Outlander Plug-in Hybrid EV's energy regeneration capability, the car can accelerate and slow via single-pedal mode, providing easier driving operation with less pedal-change.

*With an approved Bi-directional Electric Vehicle Supply (EVSE), sold separately to the vehicle.
†Excludes ES models.

DEMAND THE SPOTLIGHT

Agile and adventurous, the new Outlander Plug-in Hybrid EV stands proud with distinctive LED headlights, sculpted sides, horizontal rear profile, and head-turning 20-inch alloys*. Plus, you're always ready to rock with Mitsubishi's legendary Super-All Wheel Control technology – giving you the green light to tackle any terrain and never miss a beat.

*Aspire, Exceed & Exceed Tourer models only.

Comfortable equipment

The new Outlander's interior is designed to provide a more comfortable cabin space. No matter which seat you choose, every passenger can enjoy a relaxing travel experience.

3-zone automatic air conditioning⁺

Temperature settings can be adjusted independently for the driver, front passenger and rear seats. Rear-seat air outlets and control switches are conveniently located on the back of the floor console.

Power panoramic sunroof⁺

The panoramic power sunroof features a wider opening to add a more spacious feel to the interior.

Pull-up type sunshade⁺

A sunshade extends from the rear door trim to effectively reduce glare from direct sunlight, further enhancing rear seat comfort.

Powered seating memory⁺

Along with the memory switch, the registered driver/front passenger seat and side mirror positions can be recalled. Also linked to the key is the driver memory settings, including air-conditioning and navigation preferences.

Storage space

New Outlander provides plenty of easy-to-use storage space for everyday items like wallets, smartphones and drinks.

Glove box

A glove box on the instrument panel opens to provide ample storage space for small travel items.

Floor console box with armrest

An easy-to-reach floor console box situated between the front seats offers another versatile storage option.

Front seatback pockets

Convenient seatback pockets provide storage for smartphones, keys and other small essentials.

Bottle holders

The bottle/cup holders are carefully positioned to be in easy and safe reach for the driver.

⁺Exceed and Exceed Tourer models only.

BEST SEATS IN THE HOUSE

The new Outlander Plug-in Hybrid EV interior space is expertly crafted, down to the finest detail. From the exacting finish of the trim materials to the cosy support of the climate-responsive seating*, you'll always adventure in luxury and comfort.

Exceed Tourer model shown. *Exceed and Exceed Tourer models only.

Ventilated Front Seats*

For greater driving comfort, especially in warm weather, ventilation from the back rest and seat base draw out and disperse unwanted hot air.

Heated front* and second row^ seats

Heated seat cushions and seat backs swiftly warm up to provide you welcome comfort on chilly travel days.

WIDE OPEN SPACES

Designed with a luggage compartment spacious enough for any adventure, the new Outlander also offers flexible seat configurations to accommodate items both long and large. Just a tip: alongside your gear, you'll be bringing home some awesome memories too.

Power remote tailgate with hands-free access

Open the rear tailgate hands-free* by placing your foot under the rear bumper.

The tailgate's opening height is adjustable^ to fit under varied garage ceiling heights.

Cargo room

The enhanced cargo room and wider gate opening make loading and unloading luggage a more convenient and hassle-free experience.

- 1. Height: **51.8 cm**
- 2. Width: **107 cm**
- 3. Depth: **97.4 cm**

EXPLORE WITH EASE

The new Outlander Plug-in Hybrid EV comes equipped with a wide range of helpful innovations. From advanced driving technologies to enhanced comfort and convenience features, they're all designed to make you a happier, more confident driver.

Windscreen Head-Up Display (HUD)[^]

The large 10.8", full-colour windscreen Head-Up Display allows essential driver assistance and navigation information to be shown within the driver's forward field of view for improved driver awareness and reduced eye movement from the road ahead.

Frameless Rearview Mirror with Digital Monitor[^]

A frameless, auto-dimming rearview mirror with digital monitor displays a clear rearward image using a camera mounted in the rear windscreen, providing clear, unobstructed rearward view even if cargo or passengers completely block the driver's direct rearward visibility.

Smartphone wireless charger[^]

The front console tray features a wireless charger that allows Qi-enabled smartphones to charge simply by placing them on it, eliminating the need for a charge cable.

Full Digital Driver Display

A wide 12.3" full digital driver display offers crisp and clear view for fast comprehension of important driver information, as well as customisable views and access to vehicle and driver assist menu options.

[^]Excludes ES models. ⁺Exceed and Exceed Tourer models only.

SOUND TRAVELS

Enjoy Dynamic Sound Yamaha with up to 12* dedicated speakers. Mitsubishi's exceptional engineering works in concert with Yamaha's legendary craftsmanship to deliver the ultimate soundtrack to your adventures. Immersive sound quality and a range of listening modes lets you optimise every drive with the push of a button.

*Exceed Tourer model only.

YAMAHA

Dynamic Sound YAMAHA Ultimate / Premium

Dynamic Sound YAMAHA Ultimate

Inspired by Yamaha's flagship NS-5000 speaker, 12 dedicated speakers are employed, with the front 3-way configuration delivering localised instruments and vocals high up for enhanced sound presence.

Dynamic Sound YAMAHA Premium

Powerful bass and clear highs are achieved in a compact 2-way system comprising 8 speakers. The rear speakers feature woofers and tweeters integrated into a single unit to enable a wide range of sound expression.

Choose your own sound

You have the choice of four sound modes* and a range of listening positions to perfectly suit your mood. In addition, Speed Compensated Volume (SCV) provides consistent audio quality across all driving situations.

High quality audio with Speed Compensated Volume (SCV)*

You can enjoy high quality audio even on rough roads or at high speeds. To maintain clear bass sounds, both volume and equalisers are adjusted based on vehicle speed through the SCV function. In addition, five listening position settings allow you to enjoy ideal sound even more.

Four sound modes* in tune with listeners' emotions

LIVELY

Ideal for energetic beats and crisp vocals – you'll feel like dancing while you're driving (but we don't recommend it).

SIGNATURE

Brings out the emotive tones and textures of vocals and instrumentation for an immersive journey.

POWERFUL

Feel the power coursing through you as it elevates your mood and makes the drive even more fun.

RELAXING

Enjoy the passing scenery and the conversation while soothing background music enhances the ride.

*Dynamic Sound YAMAHA Ultimate only.

ACCESS ALL AREAS

As well as enhanced acceleration, cornering, and braking provided by the new Outlander Plug-in Hybrid EV's Super All-Wheel Control (S-AWC), there are also seven specialised drive modes to handle any terrain. Whether you're navigating busy city streets, conquering slippery off-road trails, or tackling anything in-between, these performance enhancers adapt to the task, delivering the control, confidence and experience you want.

Drive modes can be selected based on the road surface and the driver's preference.

Note: Some equipment may vary by market. Please consult your local MITSUBISHI MOTORS dealer/distributor for details. S-AWC is a driver support system that assists the driver with braking and driving operations. As with vehicles without this system, safe driving is required such as decelerating before entering a curve. The driver is always responsible for safe and attentive driving.

SUPER ALL-WHEEL CONTROL (S-AWC)

The new Outlander Plug-in Hybrid EV's full-time integrated 4WD control system – optimises driving and braking force for each wheel, enhances acceleration, improves cornering, and increases stability in all driving conditions.

- 4WD** For excellent traction performance, the electronically-controlled 4WD precisely distributes driving force between the front and rear tyres instantly.
- AYC** Provides optimal control of drive/braking force between right and left wheels to achieve high turning performance and driving stability.
- ASC** Controls braking force and motor output to prevent skidding whilst driving and tyre spinning when starting.
- ABS** Prevents tyres from locking during emergency braking and steering wheel operation.

GUIDE. PROTECT. CONNECT.

MiTEC

Mitsubishi Motors Intuitive Technology or MiTEC, is an integrated system[^] of brilliant innovations in action, working in unison to guide and protect, alert and connect, even entertain. It thinks like you, reacts like you, before you even know it. MiTEC delivers unsurpassed safety and next generation features to the modern-day driver.

SAFE TRAVELS

Be your family's safe pair of hands. The new Outlander's advanced safety features include 7 SRS airbags and a range of driver assistance systems to identify and warn of potential hazards, so you can take on adventures without taking unnecessary risks.

The confidence to keep moving

When you drive with confidence, you can fully immerse yourself in each drive. The Mitsubishi Outlander offers top-class safety and advanced driver assistance systems help identify potential risks around the vehicle, enabling you to avoid collisions before they occur.

- Predictive Forward Collision Warning
- Adaptive Cruise Control [ACC]
- Lane Departure Warning [LDW]
- Rear Cross Traffic Alert [RCTA]
- Blind Spot Warning [BSW]
- Driver Monitoring System [DMS]
- Multi Around Monitor

Rear Cross Traffic Alert¹

Rear Cross Traffic Alert system uses the rear side radar sensors to detect another vehicle approaching from the side when reversing. The system operates when the vehicle is in reverse at speeds below 8km/h. It can detect an approaching vehicle from approx. 20m away, alerting the driver via an audible chime and blinking BSW warning light in the side mirror.

Rear Automatic Emergency Braking¹

Rear Automatic Emergency Braking system uses the rear parking sensors to detect obstacles behind the vehicle. If a risk of a collision with an obstacle is detected, audible and visual warnings are given and the system will automatically apply the brakes. Operates when vehicle is in reverse at speeds below 15km/h.

Lane Departure Warning

Lane departure Warning uses front camera to issue an alert if the vehicle drifts from its lane while the turn signals are not operating. The system operates at speeds above 60km/h, and will vibrate the steering wheel and flash the lane departure warning light.

Lane Departure Prevention

Lane Departure Prevention uses front camera to issue an alert if the vehicle drifts from its lane while turn signals are not operating. The system operates at speeds above 60km/h, and will vibrate the steering wheel and flash lane departure warning light. The vehicle will also apply the brakes on one side to help return the vehicle to the centre of the travelling lane.

Forward Collision Mitigation³

Forward Collision Mitigation system with pedestrian detection, cyclist detection and junction assist detects obstructions ahead and issues a visual and audible alert when there is a danger of collision and automatically applies the brakes to avoid collision or reduce impact speed/severity.

Blind Spot Warning² & Lane Change Assist²

Blind spot Warning uses the rear side radar sensors to detect another vehicle travelling or overtaking in the next lane behind. The system operates at speeds above 10km/h, and will illuminate the BSW warning light in the corresponding side mirror when a vehicle is in the detection zone. If driver activates the turn signal towards the corresponding hazard, the BSW lamp will blink and audible alert will sound twice.

Multi Around Monitor^{*}

Multi Around Monitor provides a 360° birds-eye view of your car. The view from cameras mounted on the front, rear and sides of the vehicle (including birds-eye view) can be displayed in various combinations to reveal what is in blind spots and help you park more safely.

Rear View Camera

The Rear View Camera system automatically shows a rear view of the vehicle when the selector lever is placed in the 'R' position. The rear view image is displayed on the Smartphone-link Display Audio screen, and includes predictive guidelines based on steering wheel position.

Adaptive Cruise Control

Adaptive Cruise Control uses radar technology to detect any cars in the lane ahead and adjusts the speed of your car accordingly while maintaining a safe distance set by you.

Driver Attention Alert

Driver Attention Alert system monitors driving style and steering behaviour over a period of time, detecting changes to normal driving pattern. When the system detects that driver attention has deteriorated, audible and visual warnings are signaled to the driver suggesting 'take a break'.

Traffic Sign Recognition

Traffic Sign Recognition uses front camera to read speed limit signs and display the most recently recognised value in the multi-information display, and in the head-up display if equipped. If the vehicle exceeds the displayed speed limit value, the displayed value will begin to blink to warn the driver.

Hill Start Assist

Steep city streets or congested shopping mall ramps are no longer a problem with Mitsubishi's Hill Start Assist technology. It prevents the car from rolling backwards by maintaining braking force to give you time to move your foot from brake to accelerator.

Hill Descent Control

Drive downhill safely with peace of mind. Hill Descent Control automatically applies the brakes when travelling downhill to maintain vehicle speed so you can focus on steering.

MI-PILOT^{*}

MI-PILOT adds extra functionality to Adaptive Cruise Control with features such as Lane Keep Assist to keep the vehicle near the centre of the lane; Traffic Jam Assist which allows Adaptive Cruise Control to automatically reengage after coming to a complete stop within a short time period; and Speed Limit Assist using Traffic Sign Recognition which prompts automatic adjustment to new speed zones with a one-touch acceptance/activation when using Adaptive Cruise Control.

Predictive Forward Collision Warning³

Predictive Forward Collision warning uses the front radar to detect sudden braking of the vehicle traveling ahead of the vehicle directly in front. The system operates at speeds above 5km/h and will flash a warning light and sound an audible alert.

*Exceed and Exceed Tourer models only. ¹Please drive safely and never rely solely on these systems while driving. Drivers are fully responsible for their own safe driving. ²Aspire, Exceed & Exceed Tourer models only. ¹. Do not rely solely on this system, which may not detect all moving vehicles in certain conditions. ². The detection and control capabilities of BSW and LCA are supplementary only and do not warn you of vehicles in blind spot every situation. BSW and LCA may not activate in some situations. ³. The detection and control capabilities of FCM are supplementary only and do not prevent collisions in every situation. Please read the operation manual carefully and be aware of these limitations.

*When Genuine Accessories are fitted by a Mitsubishi Motors Dealer prior to the owner/operator taking delivery of the vehicle, they are covered by the Standard New Car Warranty of 5 years or 100,000 km (whichever occurs first), except where items are expressly excluded or for which a separate warranty applies. Or, if the vehicle is eligible for the Extended New Car Warranty and all scheduled services have been completed by a Mitsubishi Motors Dealership, Genuine Accessories will be covered up to 10 years or 200,000km (whichever occurs first), except where items are expressly excluded or for which a separate warranty applies. When Genuine Accessories are fitted by a Mitsubishi Motors Dealer after the owner/operator has taken delivery of the new vehicle, they are warranted for whichever is the greater of the following: 12 months or 20,000km (whichever occurs first); or the balance of the Standard New Car Warranty of 5 years or 100,000km (whichever occurs first); or, if the vehicle is eligible for the Extended New Car Warranty and all scheduled services have been completed by a Mitsubishi Motors Dealership, Genuine Accessories will be covered up to 10 years or 200,000km (whichever occurs first), except where items are expressly excluded or for which a separate warranty applies. If not fitted by a Mitsubishi Dealer, Genuine Accessories are covered for 12 months or 20,000km (whichever occurs first). For warranty conditions regarding Genuine Accessories, please refer to Mitsubishi Motors website www.mitsubishi-motors.com.au/owners/accessories or speak with your Mitsubishi Dealership.
